DETAILED ACTION

Response to Arguments

Applicant's arguments, see Pre-Appeal Brief, filed 15 April 2009, with respect to the rejections of the claims under 35 U.S.C. § 103(a) have been fully considered and are persuasive. The rejections of the claims under 35 U.S.C. § 103(a) have been withdrawn.

Allowable Subject Matter

Claims 1, 4-27, 29, 31-41, 43-49 and 56-68 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 1 recites a printer for printing time-based media. The printer includes, among other things, an interface which receives time-based media from a media source; a multi-media processing system which transmits commands to the media source to transmit the time-based media to the multi-media processing system; a first output device for producing an electronic output; and a second output device for producing a printed output. Examiner has not discovered this type of printer in the prior art, either in a single reference or in an obvious combination of references. The time-based media printer recited in claim 1 is advantageous over the prior art since it provides

commands to the media source to supply the time-based media to the printer, which then prints and electronically outputs the received time-based media, thus providing a level of functionality not found in the prior art.

The closest prior art discovered is the previously cited combination of Sugiyama (US-5,633,723), Ishikawa (US-5,987,226), and Yoshimura (US-6,556,241). However, this combination of prior art does not fully teach issuing a command that controls a media source to transmit time-based media to the multimedia processing system, which then produces both electronic and printed outputs. Further, Examiner has not discovered any additional prior art which fully teaches the printer recited in claim 1, either in a single reference or in an obvious combination of references. Accordingly, independent claim 1 is deemed to be allowable over the prior art.

Claims 4-27, 29, 31-40, 56-59, 62, 63 and 66-68 each ultimately depend from claim 1, and are therefore deemed to be allowable at least due to their respective dependencies from an allowable claim.

Independent claim 41 recites a method for printing time-based media. The method recited in claim 41 is performed by the printer recited in claim 1. Thus, claim 41 is deemed to be allowable for the reasons set forth for claim 1.

Claims 43-49, 60, 61, 64 and 65 each ultimately depend from claim 41, and are therefore deemed to be allowable at least due to their respective dependencies from an allowable claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
